SAMIKSHA PRASAD

Product Manager | B2B SaaS · Platform, Identity & Access, Martech
+91 90966 61521 • samiksha721@gmail.com • linkedin.com/in/samiksha-prasad-53855994

PROFESSIONAL SUMMARY

Product manager with 9 years in product: 6+ years building B2B SaaS platforms across transportation analytics, marketing technology and HR/payroll, plus 3 years of P&L-owning category management. Leads products from discovery through launch and iteration for platforms serving 5,000+ users, with a team of 8 engineers and 2 designers. Grew active user adoption 3.5× in 8 months and cut support dependency 45% at StreetLight Data; cut vendor onboarding turnaround 70% at Paychex; lifted campaign activation 115% at Zeta Global. Hands-on with AI: designs and ships LLM-agent prototypes (n8n, deployed web apps) to test product ideas quickly. ISB-certified in Product Management.

Tools: SQL · Heap · Tableau · Looker · Jira / Confluence · Figma · Miro · n8n· Lovable/Bolt/Cursor

PROFESSIONAL EXPERIENCE

StreetLight Data (a Jacobs company) Dec 2024 – July 2026
Product Manager – Transportation Platform

Lead a scrum team of 8 engineers and 2 designers owning Identity and Access management for a B2B transportation platform used by 5,000+ customer users.

- Own the Identity and Access (IAM) roadmap; grew active user adoption 3.5× (+250%) in 8 months by redesigning onboarding flows and iterating on Heap behavioural data and experiments.
- Shipped self-serve provisioning based on support-ticket analysis; shipped New Package Provisioning, User Access Redesign(Role Based Access Control)and User Profile & Preferences, cutting support dependency 45%.
- Implemented single sign-on(SSO) across the StreetLight product suite, replacing separate per-product logins with one login page that lists every product a customer has purchased, including Planning dashboards and the Esri ArcGIS-integrated Operations app; reduced access-related support tickets and raised multi-product adoption.
- Partnered with Product Marketing to redesign go-to-market workflows (marketing events, new feature launch and Product Seminars), cutting turnaround time 75% and speeding customer activation.
- Built customer enablement (live demos, onboarding training, product documentation) to shorten time-to-value across client segments.
- Set sprint and quarterly priorities by weighing roadmap bets against technical debt, using root-cause analysis of platform defects to decide what to fix first.

Paychex IT Solutions Jul 2023 – Nov 2024
Product Owner – ePlan Services (401(k) Retirement Platform)

- Led migration of legacy 401(k) recordkeeping to an API-based platform serving 100K+ users; sequenced 360 file- and API-based vendor integrations, cutting vendor onboarding turnaround 70%.
- Translated business and engineering requirements into Epics, PRDs and BRDs with clear acceptance criteria, keeping delivery compliant with retirement-plan standards.
- Prioritised the backlog across engineering, UX and client-facing teams by customer impact, business value and technical dependencies.

Zeta Global Jan 2019 – Dec 2022
Product Manager / Business Analyst – Zeta Marketing Platform (Opportunity Explorer Tools)

- Took B2B SaaS marketing intelligence platform tools from ideation to launch; delivered 37% faster turnaround on client activation and 115% more campaign activations in the first year.
- Defined and delivered roadmaps for 3 platform tools serving SMB clients and co-owned quarterly and annual release plans.
- Built a reporting tool on raw programmatic advertising data that turned it into actionable campaign insights for clients.
- Designed and analysed user experiments and engagement studies in Tableau and Looker to validate product decisions, improving customer retention and satisfaction.

- Partnered with engineering, data science and marketing to build AI-assisted workflows that improved engagement and campaign effectiveness for enterprise clients.

Panasonic India Pvt Ltd Jan 2016 – Dec 2018
Product Category Manager – Personal Care Appliances

- Owned the category P&L, pricing strategy and full product lifecycle, using customer and market data to drive assortment and pricing decisions.
- Ran integrated ATL/BTL campaigns and performance marketing on Amazon (AMS) and Myntra, meeting market-share targets; used competitive analysis to shape positioning.

AI PROJECTS

- **Signal Desk – AI campaign builder.** Interactive web app that simulates martech data signals and generates campaigns, with a transparent unit-economics model showing cost vs. value per campaign. Front end on GitHub Pages; AI logic via n8n webhooks. (not published yet)
- **Angie – personal AI assistant.** Telegram assistant that takes voice or text, transcribes speech with OpenAI, and uses LLM tool calls to summarise Gmail, check Calendar and manage tasks and contacts in Baserow. Self-hosted n8n (Docker), deployed on Railway.
